

Do not take away the Wisconsin Do Not Call List. I'm very happy with the results our family has obtained by being on the list. When I need something I will do my own research and call the companies of "MY" choice. It is a tremendous waste of my time to run for the phone and find that it is somebody trying to sell me something and even more so when that person does not take "NO" for an answer. I have never ever purchased something from a telephone solicitation nor do I plan to.
